

PROGRAMME OF THE WORKSHOP

Water projects in Horizon 2020

Hosted by the "AQUA2015" – 42nd IAH Congress – Rome, Italy, 13-18 September, 2015

Main Hall of Sapienza University (Main Campus), Piazzale Aldo Moro 5, 00185 ROMA

Thursday 17 September 2015, 9.00-12.30

During the workshop, the "water" projects granted by the European Commission during 2014 under the European Horizon 2020 Research Programme will be illustrated, by their coordinators and partners. These five on-going projects are related to water use and consequently they concern groundwater too. In some cases, groundwater is the main topic developed by projects. Knowing more about these projects represents an opportunity for the IAH community to create synergy inside EU, but also with other international and global projects related to the groundwater topic. Future and further possibilities for upcoming H2020 calls would be preliminary discussed.

Preliminary Programme:

9.00-9.15: Introduction to the Workshop (Marco Petitta, Congress Chair; Grant Office Sapienza University)

9.15-9.40: Role of EASME in Horizon 2020 (Carmen Mena, EASME Brussels)
